

Obverse

This whitepaper is likely to adapt to new market trends, incorporate innovative ideas, and evolve in a manner that benefits the product and its stakeholders. Last updated on June 20, 2022.

Mission

To make web 3.0 games more enjoyable and engaging with mobile controls, and make web 3.0 games more accessible to mobile users.

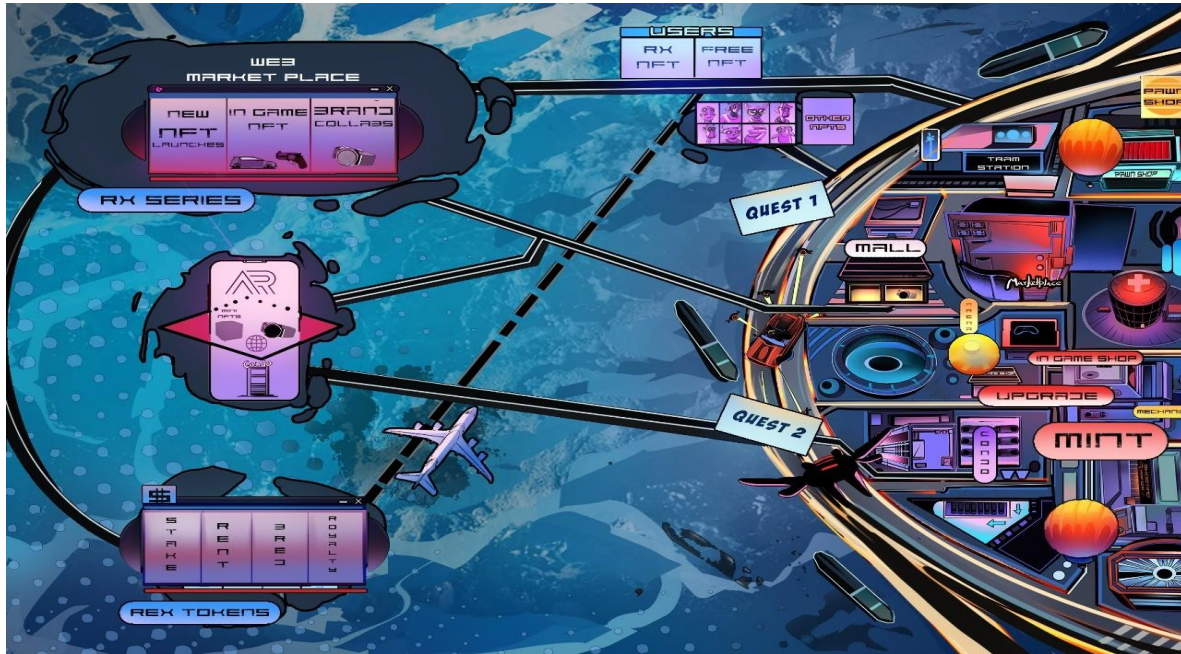

Blockchain and NFTs

Blockchain is a decentralized, unchangeable ledger that records transactions, track assets, and establish trust. With the help of decentralization & cryptographic hashing, blockchain can make digital history transparent. A blockchain is a database that holds encrypted data. This blocks and links those data together and build chronological information. This information is true and formed in single-source.

NFT stands for non-fungible token means it has unique attributes and can't get replaced. It is a digital asset that symbolizes internet valuables such as art, music, and games with a genuine certificate developed by blockchain. It can't be fake or tampered with in any way. On specialized platform, NFT exchanges occur in cryptocurrencies such as Bitcoin.

Game makers have shown a great deal of interest in NFTs. NFTs can offer a wide variety of advantages to players. You can buy goods for your game and sell them when you're done with them to recoup your money. The RX 669 Series NFTs connect mobile games, Augmented Reality NFTs, User Generated Augmentation, the actual world Virtual Reality Arcade, and the Metaverse via blockchain to enable a variety of revenue-generating opportunities for holders.

Executive Summary

Mixing the real fun of a mobile game experience with blockchain - powered by NFTs. The Game world is designed to evolve into something much beyond the game environment. The game world is a portal to integrate NFT collections as playable characters, luxury brand collaborations, a level-based reward platform, and an augmented reality showcase. No, it is not a virtual land but a mobile game where these elements are infused into the gameplay organically to PLAY and EARN in the process of having FUN. The world's first INGRESS-based web 3.0 mobile game, with the potential to be ported to other platforms such as web, AR, and VR. A mobile first Play and earn AA open world Game backed by the Real-World Metaverse.

Hybrid Gameplay

Obverse puts the player in the hot seat from the get-go and dynamically changes every mission around the player with its unique mission system, so the players never know what's to come next.

P.S. - Do remember that the world is taken over by the virus bots.

So be prepared before you wander off or do anything crazy. Engage with this futuristic world doing odd jobs and claim full ownership of what you earn from RX In-game currency (Gold and Silver) and various blueprints that can be minted into NFTs with its rewarding model and go on to owning your very own character, car, condo, weapons, and more.

Open World at its heart, the world of Obverse gives the player total freedom to do whatever the player likes. So, take a mission in the world of Obverse go on an adventure, loot the corpses you killed and sell off the dead's valuables for riches, but don't forget the city remembers and will react to your actions. One second you might be peacefully driving and the next you might be in a high pace bot chase or shooting the bad guys and more. You will never know what's to come next, because the next time you return to the same, it might not even be in that order. Getting overpowered by the enemy? Level up your Character, Weapon, and Vehicle NFT and return to the action with the checkpoint feature. Almost dead mid-action? Get the Second Life Ingress Orb, Spawn the portal and see where it takes you and you may return with full health and ammo continue exactly before you left for the portal and complete your mission.... Deja Vu Enough? Think you have earned enough Gold by doing missions and looting? Why not spend it on buying mini-NFTs like the Jordans that you've always wanted to decorate the condo of your dreams and LIVE in the dream home you just built with our AR App.

The Metaverse Platform

The world of Obverse offers its visitors and residents a surplus of amusing things and is jam-packed with things to dawdle away their duration of stay. These are a few things that can be done in the metaverse.

1. Shooting Range -

Have a Trigger-Happy Finger? Go to the nearest armory and ask the friendly face to show you the way to the Gun Range. We believe in the saying "Practice makes perfect". So go on and shoot your life away cause the next time you may just land a perfect headshot streak.

2. Fishing -

Feel like doing nothing, well you can do that too while taking in the serene beauty of lake where the Alps and the water bodies meet. Residents say it is a "breath-taking" view to take in while fishing. Go on then try catching the biggest fish to show off and get featured in the local leader boards or sell them and earn some big bucks.

3. Street Racing -

Have a thing for High Octane races? The city provides nightlife that brings in people of the same interests as you, why not take part in the same and see if you can leave them in your rear-view mirror.

Don't forget to bring in your ride.

4. Arcade Centre -

90's kid? Well, you can either buy an arcade machine for your condo and try beating the worldwide high score and earn prizes or go to the nearest Arcade Centre and spend some coins to play the same. Got tickets for playing the arcade games? Check out our Arcade shop and see what you can redeem them against. You may have enough for a perfume eraser or maybe even more for a plushie or a drone.

Arena -

The city like to rain money on the most daring of all. Think you got it all? Be sure your character is geared up and ready. People like to bet on the champions and make them duel on the field for their amusement, go head-on against others of your like and see if you can win and amaze the masses. It's a multi-day event involving various games testing players' abilities.

5. Pawn Shop -

Found something exciting in the world? Think it is worth something? Why not take it to the pawn shop and see what they quote you for it. You may get lucky and become rich, or you could also decide to keep the same or buy something expensive and show off your wealth in your condo.

RX 669 series NFT

1. RX 669 Series – RX 669 are the character NFTs that come with their unique set of cosmetic and gameplay traits. The characters are concept sculpted in VR via Oculus, then hand sculpted in 3D to ensure maximum detail and richness.
- Users will be able to Stake, Rent, Trade, and Breed their character NFTs.

Rarity chart:

RX 669 Series Types	Rarity percentage
Common	45%
Rare	30%
Very Rare	16%
Epic	8%
Legendary	1%

Rarity distribution:

The RX character NFT has physical traits and in-game ability traits.

1. Physical traits: The physical traits are given below:
 - Skin
 - Breed
 - Eye Color
 - Clothes
 - Neck Accessories
 - Hand wearables
 - Eye wearables
 - Tattoo
 - Teeth

2. In Game traits: All Abilities have level-based upgrades and can be upgraded for better DPS. Other variations and rarity percentages of these traits are TBA.

- Common Ability

1. Slo-Mo –Be like NEO, Slow down time enough to shoot or escape (Time Based)
2. Cloak Mode – “Harry Potter” it and become invisible for some time and confuse enemies
3. Anti-Gravity –Makes Enemies float “UP” (Time Based)
4. Shield –Gives temporary shield (Time Based)
5. Earth Quake –Spawns sink hole and stuns some enemies; some enemies may fall off (Chance Based)
6. Frost –Temporarily stuns some enemies, shooting enemies breaks them like ice/glass (Time Based)
7. War Cry –Do the Iconic Roar, some enemies may get frightened and run (Chance Based)
8. Doppelganger: Spawns player duplicate from Multiverse that assists in shooting (Time Based)
9. Psychosis –Turns Enemy into friendly (Time based)
10. Foul Breath –Acid Projectiles to throw like grenades that burn enemies (Skill Based)
11. Bullet Split –Not like Banana Split, shoot in the air, and midway the bullets will split away to attack nearby enemies (Chance/Time Based)
12. Thunderstorm –Take help from the “God of Thunder” himself and shock your enemies

- Legendary Ability

13. Asset Flip –Not Literally but figuratively, turn the world upside down and see the enemies Fall...Up?

- Stamina

- XNA

- Health

Munitions NFT

The munitions represent the WEAPONS comprising different models, behaviors, and attacks. When paired with the right characters, they can become powerful combinations.

Guns :

We love guns...! Enough said...

(Note- Munitions function as an additional accessory but is not mandatory to purchase for the game access) **

Pink slip NFT

Own a virtual vehicle even under 18 and ride anywhere at your own pace, save on commuting costs and earn passive game income by converting it into a taxi.

Upgrade your vehicle or put some stripes on it. These vehicles are not your regular ones with rubber flat at the bottom but are badass neo retro designs conjured for the metaverse .

(Note- Vehicle NFT functions as an additional accessory but is not mandatory to purchase for the game access).

Knick-knacks NFT

The rewarded Augmented Reality NFTs. May come through celebrity/brand collaborations, own designs, or other through NFT clubs.

Obverse gives the ability to earn knick-knacks via looting during player adventures/missions. Holding a Knick Knack NFT enables the players to,

1. Negotiate, trade, purchase and expand their way into the restoration empire through their collection of knick-knacks to become the next "Pawn Star" sensation.
2. Availing knick-knacks to décor and customize their condos.

P.S. - Knick-knacks rarity chart, percentage availability and categories are to be disclosed in the further updates.

Blueprint NFTs

Blueprints are secret recipes to create an item (Weapons, Vehicle NFTs). An item is successfully minted when the elements of blueprints are unlocked in the game. It can be acquired in either of the two ways:

1. On Quest Completion – Chance-based reward
2. Exploring the Open World.

Condo

Condos facilitate as cloud homes (virtual homes) that accompany with every character NFT. Obverse provides a plethora of opportunities for users to apply their imagination and customize their condos. Player Condo is accessed in the residential area that enables the user to change load-outs, select rides, equip accessories, and much more.

In-game consumables

Obverse constitutes several in-game consumables. To get a brief insight into the same, the following list is given below:

1. Hospital / Pharma Store–

Health potion: Ability to heal

Baby potion: Ability to breed

Boosters: Stamina boosters and Health boosters.

2. Mechanic Shop –

Guzzle: Car fuel (Refill your car with precious fossil fuels)

Repair: Hot rod and repair vehicle damage.

3. Armory –

Purchase ammunition (AMMO)

Gun decay repair: Repair damaged weapons to increase DPS (Damage Per Second).

Gun upgrade: Upgrade your gun here (The default weapon users will have limited upgrades).

4. Pawn Shop –

Random collectibles: Different collectibles, antique ornaments, and historical collections of our ancient metaverse.

Marketplace

Obverse has an in-game and extended web marketplace for the following functions:

1. Buy, sell and trade character (NFTs), munitions (NFTs), pink slips (NFTs), and knick-knacks (NFTs). In-game collectables , blueprint NFTs , internal game play system

2. New NFT launches

3. Brand Collaborations

4. Stake, Breed , Rent.

The minted NFTs are tradable on EVM-compatible marketplaces and internal marketplaces. More features TBA

REX Currency

Obverse rewards players with Gold and Silver (In-game currency). Further details on the Gold and Silver are TBA.

Staking

RX 669 Character NFTs can be staked in order to be rewarded with Royalty NFTs and In-game gold and Silver.

Renting

Users can rent their NFTS to earn in-game currency (Gold and Silver). They can list the following NFTs on the marketplace.

Character NFT

Royalty pass NFT

Munitions NFT

Pink slip NFT

The rewards and royalties for renting each NFT are yet to be released. In the future, the renting will be upgraded and more options will be available.

Breeding

Breeding is a process to combine 2 RX 669 character NFTs and create a new off-spring NFT. The players can breed in the laboratory and must possess a baby potion to create a new offspring. The resulting new NFT will carry unique traits because that is how we believe babies are actually made.

The probability and the rarity distribution of the offspring will be disclosed in the later stages.

Collaboration

Obverse is designed for interpolation and collaboration with other NFT collections and brands. The Game monetization strategy allows all stakeholders and the users to savor the benefits that come with the partnership.

Imagine buying a Jordans NFT and using them in-game to increase your stamina, and speed, track your step count and earn rewards in return.

Or

Getting a scratch card during the collaboration week. The scratch card may reward the players with real money and exciting prizes.

Or

Leaping into other metaverses and interacting with new citizens. Our metaverse is designed to collaborate with other NFT collections to invite them in as playable characters.

More collaborations such as these will follow as the development continues.

Royalty Pass NFT

Players without character NFTs can still access the game through **Royalty passes**.

The Royalty pass system enables and encourages web 2.0 casual and hardcore gamers to try the game before investing. (A player's progress in the game isn't restricted by the type of NFT they hold.)

The following are the restrictions for the Royalty pass holders:

1. System-generated default characters will be assigned each session. Traits, attributes, and upgrades pertaining to the character will be reset on every session end. Simply put, they will not be able to own a character. (Note – Logging in starts the game session and exiting the game is counted as session end)
2. Privileges provided to character NFT holders are not accessible to Royalty pass holders.

3. As a royalty pass holder earns Gold and Silver, a percentage of his or herearnings and ad revenue through him will automatically pass on to the RX 699 NFT holder who staked and received that particular Royalty Pass NFT.

Character NFT holders will be rewarded with royalty passes upon staking their NFTs and may rent or sell them in the market.

Obverse AR App

Obverse AR app enables users to augment their NFTs in the real world and travel to your condo in real life.

The Obverse roadmap aims to combine NFTs and AR Marketing Campaigns in the real world, and to integrate social media, allowing holders to display and show off their OWN NFT possessions. Hence creating IP value to extend it to various mediums. The features of the AR app, these will be revealed in the later stages.

Value Proposition

RX 669 Series NFTs will act as an entry pass to every metaverse game we create.

Ultimately, we envision a series of game verses interconnected through blockchain and NFTs.

1. Our aim is to bridge the gap between web2 users and web3 users. Obverse facilitates Web 2.0 users making the transition to Web 3.0.

- When it comes to gaming devices, mobile gaming tops the list. In light of that, Obverse will be mobile-first. The chart represents how much of people's total time playing video games is on the following devices (Scale 0-4). Device usage was ranked on a scale of 0-4 where 0 indicates the device is never used and 4 signifies the device is used most of the time.

Country	Gaming console	Computer (laptop or desktop)	Tablet	Mobile phone
France	1.37	1.62	0.99	1.85
Germany	1.21	1.83	1.00	1.79
India	1.40	1.88	1.21	2.28
Italy	1.46	1.80	1.20	1.89
Japan	1.03	1.02	0.75	2.29
Singapore	1.07	1.61	1.11	2.29
South Korea	0.82	1.67	0.88	2.30
U.K.	1.55	1.35	1.16	1.61
U.S.	1.38	1.49	1.03	1.78
Global	1.25	1.59	1.04	2.01

How much of your total time playing video games is on the following devices? (Scale 0-4)

3. Leveraging arcade and casual game mechanics: More than half the people who play video games each week consider themselves casual gamers. With so many casual gamers, it's not surprising that Casual Single-Player games (such as Candy Crush, Angry Birds, and Spider Solitaire) are played most often. Mobile phones are the most common device used for gameplay, reflecting the number of Casual Single-Player games available on mobile and how easy it is to play your favorite game when you have free time or want a brief diversion. In this year's survey, to better understand the behaviors and opinions of different types of gamers, respondents were asked to choose what type of gamer they consider themselves.

Age	Aspiring professional	Expert	Casual Gamer	Novice
18-25	6.3%	25.2%	52.2%	16.3%
26-35	5.9%	26.0%	53.3%	14.8%
36-45	4.1%	23.8%	53.6%	18.5%
46-60	1.1%	10.4%	61.8%	26.8%
Over 60	1.1%	5.6%	59.8%	33.6%
All	3.5%	17.8%	56.6%	22.2%

Types of gamers

The majority of respondents (56.6 percent) consider themselves casual gamers. 22.2 percent are novice gamers, 17.8 percent are experts, and 3.5 percent consider themselves aspiring professionals. Older gamers are more likely to consider themselves novice or casual gamers. Only 5.6 percent of those over 60 identify as experts. Obverse aims to make a massive community by bringing casual gaming and open arcade world together.

4. Minimum investment and maximum returns Introducing scholarships and renting programs to make affordable to everyone.

PLAY and EARN vs PLAY to EARN

Similarities

It's a business model that embraces the concept of an open economy and provides financial benefits to all players who add value by contributing to the game world.

Differences

- In Play2Earn, rewards work as a stimulus to play more and spend more time in the game. Players are compelled to play so that they can earn. The "play" part is not necessarily a fun experience.
- Obverse believes in Play, Progress and Earn. We believe players should enjoy a game for its experience rather than grinding it for the ROI. We aim to balance the game play to reward the game skill and time they spend in our verse. Not for mouse clicks.

Earning model	Play 2 earn Decentraland	Play 2 earn Axie Infinity	Play and earn Zaroverse	Play and earn Solchicks	NA The Witcher
Genre	Open world and virtual reality	Card and PVP	Open world, Hybrid casual and RPG	RPG, Fantasy and PVP	Open world, RPG and fantasy
Storymode	NO	NO	YES	YES	YES

Hold and drag (Left/Right, Joystick)	NO	NO	YES	YES	YES
Swipe/Flick	NO	YES	YES	NO	YES
Tap	YES	YES	YES	YES	YES
Pinch	NO	NO	YES	NO	NO

Technology Stack

We are the first to mix OpenWorld and Hyper casual game genres, our target platforms as of now being mobiles we are choosing to move forward with Unity to utilize its URP (Universal Render Pipeline) which we wholeheartedly believe will help us deliver a game of this scale without compromising on the quality that we have envisioned.

Ethereum blockchain for the character RX NFTs - ERC 721

Polygon Blockchain for the In-Game NFTs - ERC 20 and ERC 1155

Team

1. Management team – Anand Kumar, Sai Sreekar, Arinjay chaudary, Selvam
