

META LABS — COMPETITIVE RESEARCH

A visual and structured compilation of the competitor research conducted during the Meta Labs product journey.

Why this document exists

The original research archive contains 30 competitor/market analyses created in July 2022, covering Play-to-Earn, NFT, metaverse and adjacent crypto products. This document condenses that archive into a portfolio-ready research artifact while preserving the original research framing and reported metrics.

Research scope

The source spreadsheet classifies the projects by genre and blockchain, while the individual reports primarily contain Similarweb website analysis for Apr–Jun 2022, including traffic, audience, engagement, geography and competitive comparison views.

30	27	Apr–Jun 2022
competitor reports	reports with monthly traffic data	measurement window

WHAT THE RESEARCH COVERED

The competitor set was deliberately broad rather than limited to direct game competitors. It included Play-to-Earn games, NFT collections, metaverse platforms, NFT marketplaces and discovery/analytics platforms. The source spreadsheet identifies examples such as Treeverse, Prime Ape Planet, Oxya Origin, Samurai Saga, Laid Back Llama, Cyborg86, Solchicks, DeFi Kingdoms, Splinterlands, Farmhouse, Guild of Guardians, Netvrk, Rumble Kong League, World of Women, Flufworld, Decentraland, NFT Worlds, CloneX, Brave Frontier Heroes, F1 Delta Time, Boss Bulls, The Martians, Crypto Unicorns, NBA Top Shot and others.

Research lenses visible in the source material

Lens	What was examined
Audience & demand	Website traffic, unique visitors, geography and device distribution
Engagement	Pages/visit, visit duration and bounce rate
Competitive context	Traffic comparison against adjacent websites and platforms
Product category	Play-to-Earn, NFT, Metaverse and related categories
Technology / ecosystem	Blockchain used by the project where recorded
Positioning	Project website messaging and category framing

Portfolio interpretation

For the portfolio, this research is strongest as evidence of the discovery and competitive-analysis stage of product building: the breadth of the benchmark set demonstrates that product decisions were informed by market, audience and competitor signals rather than only by feature ideation.

COMPETITOR LANDSCAPE — SOURCE DATA

Competitor	Genre	Blockchain	Monthly visits	Unique visitors	Duration	Bounce
Axie Infinity			7.979M	1.901M	00:06:49	25.83%
Boss bulls	NFT	Polygon	—	—	00:06:07	46.44%
Bravefrontierheroes	Play2earn	Ethereum	394,826	130,456	00:05:07	50.36%
Cryptounicorns	Play2earn	Ethereum	144,719	38,412	00:05:00	51.80%
Cyborg 86	NFT	Ethereum	—	—	00:00:50	92.69%
Dappradar			1.898M	831,245	00:02:28	53.06%
Decentraland	Play2earn	Ethereum	1.921M	825,942	00:06:38	42.74%
Defikingdom	Play2earn	Harmony, Avalanche	1.224M	199,433	00:09:06	24.83%
F1deltatime	Play2earn	Ethereum	22,294	10,485	00:03:23	20.72%
Farmhouse	Play2earn	Polygon	205,962	43,057	00:04:49	53.80%
Flufworld	Play2earn	Ethereum	4.755M	931,410	00:09:20	39.67%
Gate			13.14M	3.089M	00:05:12	47.00%
Gods Unchained			1.038M	325,381	00:03:27	44.65%
Guild of guardians	Play2earn	Ethereum	170,967	74,936	00:01:47	55.71%
Laid back lama	NFT	Ethereum	17,955	9,833	00:01:46	49.27%

COMPETITOR LANDSCAPE — SOURCE DATA (CONT.)

Competitor	Genre	Blockchain	Monthly visits	Unique visitors	Duration	Bounce
NBA top shot	Play2earn	Ethereum	3.127M	780,838	00:07:17	40.29%
NFTworld	Play2earn	Ethereum	394,826	130,456	00:05:07	50.36%
Netvrk	Play2earn	Ethereum	40,450	19,430	00:01:34	55.95%
Opensea			64.28M	16.07M	00:08:29	26.97%
Oxyaorigin	Play2earn	Ethereum	10,029	5,237	00:02:03	63.00%
Playtoearn			629,939	253,669	00:05:18	44.40%
Prime ape			49,242	16,949	00:03:03	68.49%
Samurai saga	Play2earn	Ethereum	49,689	23,545	00:01:45	46.01%
Solchicks	Play2earn	Solana	91,218	39,046	00:02:02	61.84%
Splinterland	Play2earn	Hive	2.510M	419,115	00:17:50	26.29%
The martians	NFT	Ethereum	—	—	00:03:03	43.26%
Treeverse	Play2earn		16,407	9,221	00:00:24	90.96%
World of women	NFT	Ethereum	89,840	48,738	00:02:19	54.25%
rumblekongleague	Play2earn	Ethereum	18,018	7,790	00:00:59	68.65%
sorare			4.755M	931,410	00:09:20	39.67%

VISUAL COMPETITOR WALL

SELECTED COMPETITOR SNAPSHOTS

These examples are useful as portfolio callouts because they show how the research moved from raw market observation into comparable signals.

Axie Infinity

Category: Not recorded **Blockchain:** Not recorded **Monthly visits:** 7.979M **Unique visitors:** 1.901M **Visit duration:** 00:06:49 **Bounce:** 25.83%

Decentraland

Category: Play2earn **Blockchain:** Ethereum **Monthly visits:** 1.921M **Unique visitors:** 825,942 **Visit duration:** 00:06:38 **Bounce:** 42.74%

NBA top shot

Category: Play2earn **Blockchain:** Ethereum **Monthly visits:** 3.127M **Unique visitors:** 780,838 **Visit duration:** 00:07:17 **Bounce:** 40.29%

Splinterland

Category: Play2earn **Blockchain:** Hive **Monthly visits:** 2.510M **Unique visitors:** 419,115 **Visit duration:** 00:17:50 **Bounce:** 26.29%

Flufworld

Opensea

Category: Not recorded **Blockchain:** Not recorded **Monthly visits:** 64.28M **Unique visitors:** 16.07M **Visit duration:** 00:08:29 **Bounce:** 26.97%

What this demonstrates

The selected set spans different competitive positions: large-scale game ecosystems, metaverse platforms, digital collectibles, trading-card experiences and marketplaces. The original reports provide comparable traffic and engagement signals, making them useful for benchmarking reach and website engagement during the research period.

PORTFOLIO-READY RESEARCH STORY

A concise way to present this work on the website

01 — Start broad. I mapped the surrounding ecosystem across Play-to-Earn, NFT, metaverse and marketplace products rather than looking at a single competitor set.

02 — Benchmark behaviour. I compared audience scale and website engagement using traffic, unique visitors, visit duration, bounce rate, geography and device distribution.

03 — Compare product positioning. The research covered projects with different models, audiences and blockchain ecosystems, allowing product and market patterns to be viewed side by side.

04 — Feed product decisions. The research sat alongside persona work and product/economy design, forming part of the discovery layer behind the Meta Labs product.

IMPORTANT SOURCE NOTE

All quantitative figures in this document are transcribed from the competitor reports contained in the Meta Labs portfolio archive. The reports are dated July 2022 and their Similarweb measurement window is primarily April–June 2022. This document is therefore historical evidence of the research conducted at the time, not a current market ranking.

Recommended website treatment

Use this document as a visual research artifact rather than displaying the full matrix on the portfolio. A strong website treatment would show the competitor wall, a compact ecosystem map, 3–5 benchmark cards, and the research-to-product decision narrative. The complete document can sit behind an expandable “View research” interaction.
